Professional Summary

Industrial Engineer with 8+ years of experience in lean manufacturing, process optimization, and operational excellence within the textile and apparel industry. Proven ability to improve efficiency, reduce waste, and enhance production flow through data-driven analysis, Kaizen implementation, and cross-functional collaboration. Skilled in time studies, layout design, and performance measurement using Lean and Six Sigma tools.

Professional Experience

Assistant Manager – Industrial Engineering / Lean Implementation

Interloop Limited, Faisalabad | Jul 2023 – Present

- Lead lean initiatives focused on cycle time reduction, manpower right-sizing, and waste elimination across multiple production plants.
- Conduct Value Stream Mapping (VSM), Time & Motion Studies, and Process Flow Analysis to identify bottlenecks and optimize resource utilization.
- Collaborate with Production, Quality, and Maintenance teams to improve line balancing, equipment efficiency (OEE), and quality performance.
- Govern efficiency modules for Boarding and Toe Closing incentive systems implementation.
- Track KPIs and implement continuous improvement projects aligned with IOS and JIT frameworks.
- Partner with Financial Analysis and UOM development teams to align production data with cost metrics.
- Drive Kaizen and 5S initiatives to improve workplace organization and process visibility.

Senior Officer – Industrial Engineering / Lean Implementation

Interloop Limited, Faisalabad | Jun 2019 – Jun 2023

- Developed and standardized SOPs and Work Instructions for consistent production processes.
- Conducted training sessions on Lean, SMED, and problem-solving tools to promote continuous improvement culture.
- Designed ergonomic workstation layouts and performed facility layout optimization to improve operator efficiency.

- Executed GSD-based work analysis and capacity planning for machine and manpower utilization.
- Analyzed process data and implemented corrective actions, achieving measurable improvements in efficiency and quality.

Officer – Industrial Engineering

Crescent Textile Mills, Faisalabad | Jul 2018 – May 2019

- Conducted production workflow analysis to identify optimization opportunities in textile processes.
- Improved production throughput by redesigning process flow and optimizing resource allocation.
- Partnered with planning and quality departments to align production capacity with demand and ensure quality compliance.
- Reduced process variability through implementation of standardized work and corrective action systems.

Management Trainee Engineer

Style Textile, Faisalabad | Jan 2017 – Jun 2018

- Performed time studies and work measurements to identify potential improvements in work methods.
- Supported process documentation and reporting on project progress and data analysis outcomes.
- Assisted in implementing workflow changes that improved line efficiency by 15%.
- Used GSD software to analyze and optimize garment production processes.

Core Competencies

Lean Manufacturing & Kaizen Implementation | Time & Motion Studies | Line Balancing | Yamazumi Analysis | Value Stream Mapping | Process Flow Optimization | Data Analysis | KPI Monitoring | Cost Reduction | Facility Layout & Workplace Ergonomics | Project Management | Continuous Improvement | Problem Solving | 5S | JIT | Six Sigma | OEE Improvement

Technical Skills

Software: GSD, AutoCAD, MS Office (Excel, Power Query, PowerPoint), Power BI
 Tools: Pareto Analysis, Fishbone Diagram, FMEA, SPC, Control Charts
 Other: Report Writing, Training & Development, Visual Management, Data Analysis

Education

Bachelor of Industrial & Manufacturing Engineering (BE), University of Engineering & Technology (UET), Lahore | 2012 – 2016

Certifications

- Lean Yellow Belt Certification
- Lean Six Sigma Green Belt Certification
- Advanced Microsoft Excel (Data Analytics)
- 5S and Kaizen Implementation Training

Achievements

- Improved process efficiency by 15% through manpower right-sizing and workflow standardization.
- Successfully led multiple Kaizen and VSM events improving plant productivity and reducing waste.
- Played key role in Unit of Measure (UOM) development and alignment with cost analysis frameworks.
